SUMMARY

Detail-oriented and analytical Data Analyst with hands-on experience in data collection, cleaning, visualization, and statistical analysis. Proficient in Python, SQL, Excel, and BI tools like Power BI and Tableau. Skilled in uncovering insights through exploratory data analysis and machine learning techniques. Strong foundation in database management, data-driven decision-making, and reporting. Adept at translating business requirements into actionable insights to support strategic goals

EXPERIENCE

Trainee Software Developer (Python) - Intern, CamerinFolks, Kochi 09/2023 – 02/2024

- Gained practical experience in Python development, focusing on backend logic.
- Assisted in designing, coding, testing, and debugging web applications using Django and related frameworks.
- Collaborated with cross-functional teams to improve software performance, code quality, and usability.
- Followed best practices in version control using Git and participated in regular code reviews.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science, University of Calicut, Calicut 07/2020 – 04/2023

TECHNICAL SKILLS

Programming & Scripting

Python, HTML, CSS, Django

Data Visualization & BI Tools

Matplotlib, Seaborn, Power BI, Tableau, Microsoft Excel

Database

MySQL

Data Science & Analysis

Pandas, NumPy, Scikit-Learn, TensorFlow, OpenCV, NLP, Deep Learning, Machine Learning, Large Language Models (LLMs)

Cloud Platforms & Tools

Basic knowledge of Microsoft Azure and Amazon Web Services (AWS), Git/GitHub, Jupyter Notebook, Microsoft Office

Soft Skills

Creative Thinking, Problem Solving, Critical Thinking, Time Management, Quick Learner, Team Collaboration, Adaptability, Analytical Thinking, Attention to Detail, Effective Communication

LANGUAGES KNOWN

English

Fluent

Beginner

CERTIFICATION COURSE

-Data Science with AI, *IPCS Global, Calicut*

06/2024 – 04/2025

- Gained hands-on experience in data analysis, machine learning, deep learning, and AI-based solutions using Python.
- Worked on real-time projects involving data visualization, model building, and deployment using tools like Pandas, NumPy, scikit-learn, TensorFlow, and Power BI.

-Python Full-Stack Development (Internship), *Camerinfo Pvt. Ltd, Kochi*

06/2023 – 02/2024

- Trained in frontend (HTML, CSS, JavaScript) and backend development using Python, Django, and SQL.
- Built and deployed full-stack web applications, covering user authentication, CRUD operations, and responsive UI design.

PROJECTS

Hand Gesture-Based Volume Control using Computer Vision and Deep Learning

11/2024 – 01/2025

- Developed a hand gesture-controlled volume system using Computer Vision and Deep Learning with OpenCV and MediaPipe.
- Detected hand landmarks and calculated finger distance to dynamically adjust system volume in real time.
- Integrated webcam input processing and gesture recognition for a touchless, user-friendly interface.

Plagiarism Detection using TF-IDF project

08/2024 – 11/2024

- Built a Plagiarism Detection system using TF-IDF (Term Frequency-Inverse Document Frequency) and Cosine Similarity in Python.
- Preprocessed and vectorized textual data to compare document similarity and accurately identify copied or paraphrased content.
- Enabled automated content scanning and reporting for academic and content verification use cases.

Amazon Prime Statistics Dashboard

09/2024 – 10/2024

- Developed an interactive Amazon Sales Dashboard using Power BI, featuring visualizations for sales, profit, orders, and top-performing products.
- Utilized Power Query for data cleaning and DAX for KPI calculations like profit margins and monthly growth.
- Facilitated dynamic filtering and regional analysis to support e-commerce decision-making.

Diabetes Prediction

06/2024 – 08/2024

- Built a Diabetes Prediction model using supervised Machine Learning algorithms like Logistic Regression, SVM, and Random Forest.
- Performed data preprocessing, feature selection, and model evaluation using metrics such as accuracy, precision, recall, and ROC-AUC.
- Improved prediction accuracy and reliability, aiding in early diagnosis using healthcare datasets (e.g., PIMA Indian Diabetes dataset).

Life HIS Module - Hospital Management System

06/2023 – 02/2024

- Developed a web-based Hospital Management System (Life HIS Modules) using Python (Django), SQL, HTML, and CSS.
- Implemented modules for inpatient and outpatient billing, patient record management, and appointment tracking.
- Permitted efficient hospital workflow by creating a user-friendly interface for staff to manage billing and patient data securely.

Digital Product E-Commerce

04/2022 – 04/2023

- Developed a full-stack online marketplace for buying/selling digital products using Python, Django, SQL, HTML, and CSS.
- Implemented secure user authentication, product management, and transaction functionality.
